

A large red 'X' is positioned above the word 'SpyX' in a large, white, sans-serif font. The 'X' is slightly offset to the right, creating a visual emphasis on the 'Spy' part of the name.

EXTENDED-RANGE LOITERING MUNITION UAS

SpyX loitering munition is an extended-range Precision Strike System. The system enables tactical teams to organically search, detect, acquire and eliminate targets. SpyX can carry a variety of warheads for different target types. This fully autonomous UAV can loiter up to 2 hours with a communication range of up to 50 Km. Utilizing its advanced guidance capabilities, the SpyX supports the attack of detected targets as well as predefined geographic coordinates. The system allows the operator to perform mission abort and re-engage.

KEY FEATURES

- + High Precision Strike
- + Long Range and Endurance
- + High Attack Speed
- + Triple-Sensor Payload
- + AI Based Tracking system
- + User Selectable Warheads
- + Training Configuration
- + Safe and Easy to Operate

SPECIFICATIONS

MTOW
10 Kg

COMM RANGE
UP TO **50 Km**

ENDURANCE
UP TO **1.5 Hrs**

WARHAED
UP TO **2.5 Kg**

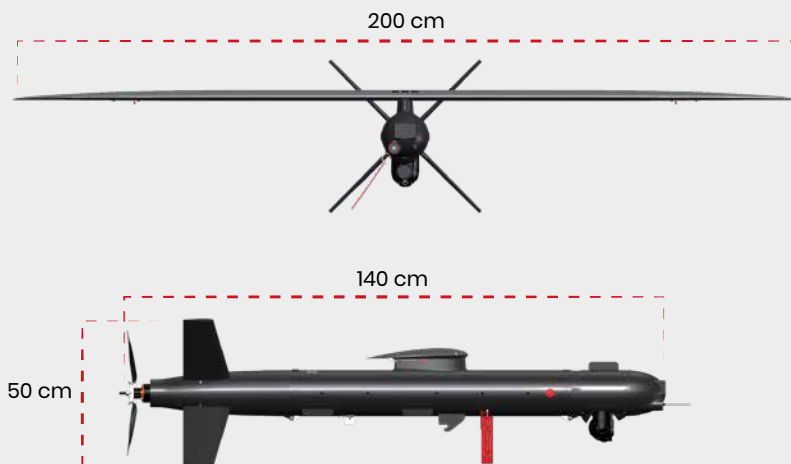

ATTACK SPEED
UP TO **250 Kmph**

STRIKE PRECISION
CEP LESS THAN **1 Meter**

DIMENSIONS

WARHEADS TYPES

Controlled Detonation:
Proximity / Impact / Delayed

ANTI TANK

ANTI PERSONNEL
/ LIGHT ARMOUR

WARHEADS EASY STORAGE

UAVs and warheads are stored separately, no need to keep the system in a bunker.
